

Mosolut Heavy

Removable floor panels from one of the largest processors of PVC cable in the world. Their properties make them ideal for both indoor and outdoor purposes. They are used mainly in production halls, warehouses, workshops, winter stadiums, for agricultural purposes and livestock, but also for cultural and sporting events.

Mosolut Heavy floors cover the grounds of many of the world's sports stadiums (such as the Munich Olympic Stadium). You can put your trust in the same recycled flooring tiles that the fans of Rolling Stones and Lady Gaga walked on.
